The original master plan

1. Release a v1 that's functional but not very usable.
2. Integrate 0x and release a v1.5 that allows partially off chain trading so people can create, modify, and cancel orders quickly and cheaply.
3. Integrate Maker and release a v2.
4. Release a v3 with high throughput and low latency so liquidity can actually form.

Q1 2020: we're going to release all of it.

v1.5 with 0x, v2 with Dai, and v3 shortly after with fast trading.
